A student can select any one of the following as Professional Competency course:

1. Technical writing with L^AT_EX.
2. Scientific Programming with Scilab.
3. Scientific Programming with Python.

PROJECT

The Project Report (Dissertation) should be self contained. It should contain table of contents, introduction, at least three chapters, bibliography and index. The main content may be of length not less than 30 pages in the A4 format with one and half line spacing. The project report should be prepared preferably in L^AT_EX. There must be a project presentation by the student followed by a viva voce. The components and weightage of External and Internal valuation of the Project are as follows:

Components	External(weightage)	Internal (weightage)
Relevance of the topic & statement of problem	6	1
Methodology & analysis	6	1
Quality of Report & Presentation	6	1
Viva Voce	12	2
Total weightage	30	5

The external project evaluation shall be done by a Board consisting one External Examiner. The Grade Sheet is to be consolidated and must be signed by the External Examiner.

VIVA VOCE EXAMINATIONS

The Comprehensive Viva Voce is to be conducted by a Board consisting of one External Examiner in each semester with 1 credit each. Total weightage of each viva voce is 30.

QUESTION PAPER PATTERN FOR THE WRITTEN EXAMINATIONS

For each course (**except FMTH4E12 Computer Oriented Numerical Analysis**)

there will be an external examination of duration 3 hours. The valuation will be done by Direct Grading System. Each question paper will consist of 8 short answer questions each of weightage 1, 9 paragraph type questions each of weightage 2, and 4 essay type questions each of weightage 5. All short answer questions are to be answered while 6 paragraph type questions and 2 essay type questions are to be answered with a total weightage of 30. The questions are to be evenly distributed over the entire syllabus (see the model question paper). More specifically, each question paper consists of three parts viz Part A, Part B and Part C. Part A will consist of 8 short answer type questions each of weightage 1 of which at least 2 questions should be from each unit. Part B has 3 units based on the 3 modules of each course. From each module there will be three questions of which two should be answered. Part C will consist of four essay type questions each of weightage 5 of which 2 should be answered. These questions should cover the entire syllabus of the course.

Question Paper Pattern for the written examination of the Elective Course: FMTH4E12 Computer Oriental Numerical Analysis

For the Elective Course **FMTH4E12: Computer Oriental Numerical Analysis** there will be a theory written examination and a practical examination each of duration one and half hours. The valuation will be done by Direct Grading System.

The written examination question paper will consist of 4 short answer questions each of weightage 1, 6 paragraph type questions each of weightage 2, and 2 essay type questions each of weightage 5. All short answer questions are to be answered while 3 paragraph type questions and 1 essay type question are to be answered with a total weightage of 15. The questions are to be evenly distributed over the entire syllabus (see the model question paper). More specifically, question paper consists of three parts viz Part A, Part B and Part C. Part A will consist of 4 short answer type questions each of weightage 1 of which at least 1 question should be from each unit. Part B has 3 units based on the 3 modules. From each module there will be 2 questions of which 1 should be answered. Part C will consist of 2 essay type questions each of weightage 5 of which 1 should be answered. These questions should cover the entire syllabus of the course.

PRACTICAL

Equal weightage to be given for methods and programming. A candidate appearing for the practical examination should submit his/her record to the examiners. The candidate is to choose two problems from part A and three problems from part B by lot. Let him/her do any one of the problems got selected from each section on a computer. The examiners have to give data to check the program and verify the result. A print out of the two programs along with the solutions as obtained from the computer should be submitted by the candidate to the examiners. These print outs are to be treated as the answer sheets of the practical examination. The part A of the practical examination will carry a weightage of 5, Part B a weightage of 7 and the practical record carries a weightage of 3.

EVALUATION AND GRADING

The evaluation scheme for each course shall contain two parts.

(a) Internal Evaluation: 20% Weightage

(b) External Evaluation: 80% Weightage

Both the Internal and the External evaluation shall be carried out using direct grading system as per the general guidelines of the college. Internal evaluation must consist of

(i) 2 tests (ii) one assignment (iii) one seminar and (iv) attendance, with weightage 2 for tests (together) and weightage 1 for each other components.

Each of the two internal tests is to be a 10 weightage examination of duration one hour in direct grading. The average of the final grade points of the two tests can be used to obtain the final consolidated letter grade for tests (together) according to the following table.

Average grade point (2 tests)	Grade for Tests	Grade Point for Tests
4.5 to 5	A+	5
3.75 to 4.49	A	4
